

History release

Image name	Description	Release date
KitraGTI-os3.1-v1.0-UBUNTU	Forked from SAMSUNG ARTIK https://github.com/SamsungARTIK/linux-artik/tree/A710_os_3.1.0 . Added sensors compatibility and modified input/output configuration to adapt to our hardware.	04/06/2018
KitraGTI-os3.1-v1.1-UBUNTU	Starting image: KitraGTI-os3.1-v1.0-UBUNTU.img Added ADAU microphone support.	
KitraGTI-os4.4-v1.0-UBUNTU	Starting image: KitraGTI-os3.1-v1.1-UBUNTU.img Merge with new branch from the official SAMSUNG ARTIK repository : https://github.com/SamsungARTIK/linux-artik Kernel update to version 4.4, drivers update and OTG working with hubs (mouse+keyboard configuration).	20/11/2018
GTI_mender_release_V1	Starting image: KitraGTI-os4.4-v1.0-UBUNTU.img Three new partitions added: rootfsA /dev/mmcblk0p7 (1.5G), rootfsB /dev/mmcblk0p8 (1.5G) and persistent data /dev/mmcblk0p9. Mender client version 1.3 running as daemon. Getting started: MENDER FOR KITRA GTI device_type=artik-a710 artifact_name=initial	21/11/2018
GTI_mender_release_V2	Starting image: GTI_mender_release_v1.img Added support for state scripts in /etc/mender/scripts. In particular added script <code>Download_Enter_10_copy-conn-conf-file</code> that saves network configuration files of the Network Manager in /mnt/data/connections before starting the update download. (To restore such files create an artifact injected with the script ArtifactReboot Leave 10 copy-conn-conf-file). Update mender client to version 1.7. Fix data partition dimension to 500 M. device_type=artik-a710 artifact_name=initial	14/01/2019
